

Branson Field Laboratory

Physical Information Acknowledgement

We want to make sure that you understand the physical expectations for our course, health and health insurance precautions that you should consider, and the nature of our food service. Please read the information below, sign to indicate that you understand these conditions, and return this page with your application.

As an applicant to the University of Missouri's Geology Summer Field Course, I was advised months in advance by Dr. Barquero-Molina that I should be in physical condition sufficient for hiking and rough walking at altitudes of 5,000 to 9,000 feet. Furthermore, Dr. Barquero-Molina advised me to obtain the necessary vaccination for immunity to tetanus.

We strongly encourage you to carry an accident and sickness insurance plan while you are attending our course. However, this is not a requirement for acceptance to the course. Please indicate below whether you will be covered by such a plan.

I will provide my own health insurance.

We make reasonable meal accommodations for students who do not eat meat. However, because of the number of students we serve, the camp is unable to completely accommodate people who are on special diets (e.g. no salt, vegan diets) or who want to fix their own meals. I was made aware of this well in advance of the summer camp.
